

Seating Wedge

Ideal for people sitting for extended periods, this foam seating wedge helps to maintain the spine's natural curvature and alleviates nerve pressure in the mid-back area.

The anatomically desirable nine degree angle encourages correct pelvic tilt to reduce pressure on lumbar discs – minimising potential back problems.

A multi-purpose seat cushion which is normally used with the lower end in front, but for use in car, can be turned to help firmly position the user against the back of the seat, to prevent downward slide or strain on the lower back.

CODE	BL9405
HEIGHT	100 > 40 mm
WIDTH	430 mm
DEPTH	400 mm
CAPACITY	120 kg
WARRANTY	1 year
